SONOMASTER CHRONOGRAPH BLACK THUNDER

BI-RETROGRADE BLACK & BLACK

A New Story of Time and Rock Legends Painted Black ! It always starts in a pitch-dark room. Seconds of sacred silence before the unleashing of a thousand Watts of musical genius and madness. Suddenly, you hear the wooden shock of two drum sticks marking the tempo like two clock hands running towards each other, the beginning of a new story of time ... The atmosphere of the greatest rock concerts is injected into every component of the RESERVOIR Sonomaster Chronograph Black Thunder. Like an electric shock on the wrist, its elegant design reproduces the hands of power measurements or VU metres from analog stereo amplifiers. They will make each second a tempo on which the most beautiful performances of your life will be played. It has the famous “Bi-Retrograde” display of RESERVOIR. Two half-moon-shaped areas were free to accept the date and real-time seconds, creating a clever solution for maximum readability that makes this rock ratch as atypical as all the legendary misfits of the genre. This bi-retrograde watch date and seconds at 120° follows the RST chronograph model from RESERVOIR with central second, 30-minute counter at 12, hour counter at 6. The watch is powered by the new watchmaking caliber RSV-Bi120: a manufactured bi-retrograde chronograph movement, an automatic mechanical winding, and a column wheel (base LJP-L1C0). A clever design that takes eyes on a journey into backstages and studios. Delivery from Nov. 20th 2022
