

## AIRFIGHT PROPELLER

As he reaches his peak, the smoke trails carve patterns in the sky, reminding the pilot that he alone is in charge of the speed and the trajectory. It is here in this time and space that movement and rigour make their mark in a surge of adrenalin. The AIRFIGHT collection takes its inspiration from aircrafts, and centres on the black colour of the on-board flight instruments.

Powered by the new caliber RSV-240, a proprietary patented three-complication module coupled to a manufacture movement (LJP-G100 base), combining retrograde minute, jumping hour and a 56-Hour power reserve. Delivered in a prestigious wooden box with an additional NATO strap.
