

**2023 NOVELTY**

**GT TOUR RACING**  
**CARBON DIAL**

The GT Tour Racing pays tribute to the codes and the world of contemporary motor racing sport, whose associated advanced technologies are constantly evolving. The new, resolutely modern, version is inspired by the materials used in the world's most powerful and durable racing cars – including Formula 1 cars – for which carbon is an essential material to achieve exceptional performances. The GT Tour Racing features a unique dial made entirely of woven carbon fiber, a design that gives the watch a strong and assertive sporty look. Worn with an automobile leather-style perforated black strap, the GT Tour Racing is a tribute to the golden age of the car race. Powered by the new caliber RSV-240, a proprietary patented three-complication module coupled to a manufacture movement (LJP-G100 base), combining retrograde minute, jumping hour and a 56-Hour power reserve. Delivered in a prestigious wooden box with an additional NATO strap.
