TIEFENMESSER TOURBILLON

ONLY WATCH 10TH EDITION

The Tiefenmesser Tourbillon is a unique RESERVOIR x TÉLÔS watch co-creation for Only Watch 2023, combining creative vintage display - 240° retrograde minute and jumping hour - with renowned high-watchmaking savoir-faire from Switzerland. RESERVOIR proudly presents its very first in-house Tourbillon in collaboration with TÉLÔS watch: a major technical step change for the emerging and independent brand, achieved with the collaboration of the renowned movement manufacturer from La Chaux-de-Fonds, RESERVOIR's strategic partner since its earliest days. The unique crafted piece takes inspiration from the nautical measuring instruments of the last century, with a typical display like the depth gauge aboard submarines. Encapsulated in a bronze case, it displays a regulator-type enamel "Grand Feu" dial, a blue hand for the retrograde minutes at 240° and jumping hours – last both being the brand's aesthetic signature. The unique Swiss made watchmaking savoir-faire of TÉLÔS watch is demonstrated by the imposing presence of a tourbillon at 6 o'clock featuring 437-pieces and 46-stones. Clocked at 4Hz and powered by a double barrel, it offers a 60-hours power reserve. The case back reveals an exclusive oscillating weight engraved with indications found on "chadburns" from old submarines. Worn on a blue alligator leather strap, and delivred in a luxury wooden box. Unique Piece.
