FIRST GEN CALIBER

TIEFENMESSER SEA HORNET

SOLD OUT

Immersion is imminent. A submarine quietly folds into the unfathomable depths of the ocean, disappearing without trace from the surface and taking with it a world whose space is enclosed in heat and wetness... The TIEFENMESSER collection takes its inspiration from the materials that feature so prominently in submarine equipment : black & yellow depth gauge. Powered by RESERVOIR's first generation caliber: a self-winding mechanical movement combining an exclusive patented 124-piece module on an ETA-2824, to bring to life the retrograde minute, jumping hour and a 37-hour power reserve. Black PVD 316L stainless steel case with satin and polished finish mounted on a leather strap. Delivered in a prestigious wooden box with an additional NATO strap.

4,400 €
